

MAY 2019 INTERSITE CALL:
PERFORMANCE MEASURE TRENDS

THE ANNIE E. CASEY FOUNDATION

Local Deep End sites vary in size, culture and demographics, but all are working toward the same innovative goal: to safely and significantly reduce juvenile confinement, especially for youth of color

Local Deep End Sites

- Bernalillo County (Albuquerque), NM
- Camden County, NJ
- Dakota County, MN
- Franklin County (Columbus), OH
- Hennepin County (Minneapolis), MN
- Lucas County (Toledo), OH*
- Marion County (Indianapolis), IN
- Pierce County (Tacoma), WA*
- Ramsey County (St. Paul), MN
- St. Louis City, MO
- Summit County (Akron), OH

At first glance.....

- You and your analysts are awesome. This was a heavy lift, and you rocked it.
- Placements are down, especially for black youth.
- Referrals and Felony Filings are mostly down.
- Diversion is increasing, especially for white youth. (Exception in sites where referrals fell dramatically.)
- Inconsistencies across sites and within sites on how referrals and diversion is counted. Not a problem anyone needs to correct, but that's why we don't show comparative referrals or diversion data – it would be apples to broccoli.
- Variety of issues with tracking Latino and multi-race youth.
- Lots of youth assessed as low-risk are still ending up on probation. In one site, low-risk accounted for 80% of all dispositions to probation.

Looking at placements relative to the juvenile population (< 18-years-old) allows “apples to apples” comparisons across sites.

**FRANKLIN PLACEMENTS,
RELATIVE TO 10,000 in POPULATION
AGED 0-17 (2014-18)**

**PLACEMENTS RELATIVE TO 10,000 in
POPULATION AGED 0-17,
OHIO DEEP END SITES (2018)**

The degree to which Deep End sites rely on placement varies quite a bit from place to place.

PLACEMENTS PER 10,000 JUVENILE POPULATION (2018)

This graph shows the number of placements for every 10,000 young people (<18) in the jurisdiction's overall population.

Placement rates have dropped in all but one site for which we have reliable baseline and 2018 data.

**PLACEMENTS PER 10,000
IN JUVENILE POPULATION
(Cohort 1: 2012 v. 2018)**

**PLACEMENTS PER 10,000 JUVENILE POP'N
(Cohort 2: 2014 v. 2018)**

Black youth are significantly more likely than white youth to be placed outside the home. In one site, black youth are 26 times more likely to be placed.

**PLACEMENTS PER 10,000 JUVENILE POPULATION (2018) –
WHITE V. AFRICAN AMERICAN YOUTH**

PLACEMENTS PER 10,000 YOUTH (AGED 0-17) IN COUNTY OR CITY POPULATION

2014

2018

In every site for which we have reliable baseline and 2018 data, placement rates for black youth have shrunk considerably.
